

These are the updates of versiondog 6.5.2

20.03.2019 10:14

In this version, we have focused on optimising our support for TIA Portal, integrating FactoryTalk View 10, addition to a number of improvements and carrying out minor bugfixes.

Since the introduction of version 6.5.1, you have the following functions for **Wonderware System Platform** at your disposal:

- Objects are automatically exported from the galaxy
- Galaxies can be exported in whole

What updates and new things does versiondog 6.5.2 have to offer? A complete list of all updates and tutorials for Siemens SIMATIC, WinCC flexible and SIMATIC WinCC can be found online in [versiondog INFO](#).
